Software Developer .NET Security

Department R&D

Location Leuven / Dublin

Job Description

We are looking for Software Engineer with focus on security to join our software platform team. You will be a member of the research and development department, reporting to the Software Team Lead.

You will be working in a cross-locational, agile team of software developers, who oversee delivering the software platform for some of the newest generation food sorting machines in portfolio.

With growing EU regulations regarding cyber-security (CRA/NIS2), we are further evolving in this domain. Ideally you have experience in .NET, Windows OS, networking, and security best practices for industrial machines.

Role **Description**

• Design and implement security features in .NET stack: F#/C#-Blazor

• Configure the Windows OS to be compliant with regulations requirements

• Coach and lead the software team regarding security best practices.

• Look after the documentation regarding security designs for assessment purposes.

• Architect the introduction of security features keeping the system consistent with current architecture and design decisions, and drive changes when it is needed.

About **You**:

• Master's degree in software engineering, industry engineering or another relevant field.

• Write production standard code in .Net F#/C#-Blazor.

• Proven experience in OS configuration for security.

• Prove experience in networking.

• Interest in security projects for industrial applications.

• Ability to communicate with project stakeholders while presenting content and reporting issues.

• An analytical & structured approach to challenges.

Nice To Have

• Experience in GRPC and security implementation of it.

• Experience in OPC-UA communication and security stack.

- Experience with Azure and IoT devices.
- Experience with Prometheus, Loki and Grafana.
- Experience with application lifecycle management (ALM) systems such as Azure DevOps.
- Experience with Agile and Lean development methodologies.

Additional Information

- Hybrid Working
